LANGUAGES

Kannada

English

Hindi

SKILLS

Languages: Python, Java, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Flask, Streamlit, Scikit-learn, TensorFlow, Pandas, NumPy, SQLAlchemy

Infrastructure & Tools: AWS EC2, Docker, Gunicorn, Linux, Git, CI/CD, REST APIs

Specialisations: NLP, Deep Learning, Predictive Analytics, System Design.

PROFILE

Software Engineer and AI/ML specialist with 50+ production projects and 6 published PyPI packages. I build scalable backend systems with Flask and AWS EC2, and end-to-end AI solutions across NLP, Computer Vision, and Predictive Analytics — following SOLID principles and clean, modular architecture throughout.

EDUCATION HISTORY

BCA — Bachelor of Computer Applications – Final Year

Expected Sep 2027

Presidency College

12th Standard - May 2024

Indo Asian Academy

10th Standard - May 2022

Nobel Saint English School.

WORK EXPERIENCE

- **Full Stack Developer Intern-** Eduphonix Solutions
- Worked with a development team on real-world web applications built in

Python and Flask. Delivered 20+ projects covering data analysis, predictive modelling, and AI-driven automation — applying ML workflows, statistical analysis, and data visualisation to solve business problems.

INTERESTS

Software Development

Cybersecurity

Web Development

Python Programming

Database Management

Artificial Intelligence & Machine Learning

Cloud Computing

Data Analysis

UI/UX Design

Systems Thinking

Technical Writing

Rapid Prototyping

Cross-functional Collaboration

Continuous Learning.

CERTIFICATIONS

Cybersecurity Certification

Simplilearn (Online)

PROJECTS

AI Data Scientist

Python · Flask · AWS EC2 · Scikit-learn · Gunicorn

– Built an end-to-end AI platform with automated preprocessing, feature engineering, and model training pipelines.

– Architected REST APIs with Flask and Gunicorn for real-time predictions, deployed on AWS EC2.

– Set up production deployment with Linux optimisation and automated model versioning.

MarketMind Intelligence AI

Python · NLP · TensorFlow · Streamlit

– Built a market intelligence engine that analyses trends, competitor data, and consumer sentiment via NLP.

– Developed automated report generation and Streamlit dashboards for executive decision-making.

– Integrated ensemble models and time-series forecasting for actionable business insights.

Clinic Management AI Agents

Python · Flask · SQLAlchemy · SQLite

– Designed a healthcare system with patient scheduling, EMR, and AI-assisted diagnostic workflows.

– Implemented role-based access control, automated reporting, and HIPAA-aligned data handling.

– Built a RESTful API layer connecting frontend and backend AI services.

Enterprise Management Dashboard

Python · Pandas · Streamlit · SQLAlchemy – Designed a company-wide

analytics dashboard for resource management and operational intelligence.

– Built real-time data pipelines with RBAC and interactive visualisations.

– Followed SOLID principles throughout — modular, maintainable backend services.

Programming Visualizer

Python · CLI · PyPI

– Created an interactive educational platform for visualising algorithms and data structures.

– Published as a reusable Python package to PyPI with CLI tooling and full documentation.

Billing App — Enterprise Level

Python · Flask · SQLAlchemy · SQLite

– Built a billing automation system with invoice generation, payment tracking, and financial analytics.

– Designed a modular backend with audit trails, API versioning, and scalable schema.

Open Source & Achievements

– Published 6 Python packages to PyPI: HackBoard, Fake News Detector, Algorithm Analyzer, Programming Visualizer, Business Simulator, AI Data Scientist — all with semantic versioning and CLI interfaces.

– 50+ production-ready projects across AI, ML, web development, and enterprise software.

– Deployed AI applications on AWS EC2 with Gunicorn; 100+ public GitHub repositories.
